Top illuminated splicing rod

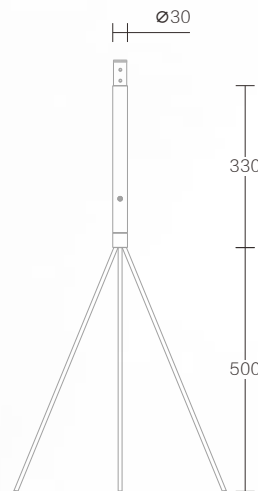

Item no.: KLM-LDD30GY/L150/5W
Size: $\varnothing 30 \times L150\text{mm}$
Voltage: DC12V

Power: 5W
CCT: 2700K/3000/4000K/RGB
6063 Aluminum

Color: Red/Orange/Yellow/Green/Sky
Blue/Purple Blue/Black/White
IP rate: IP20

Magnetic mounted

Base

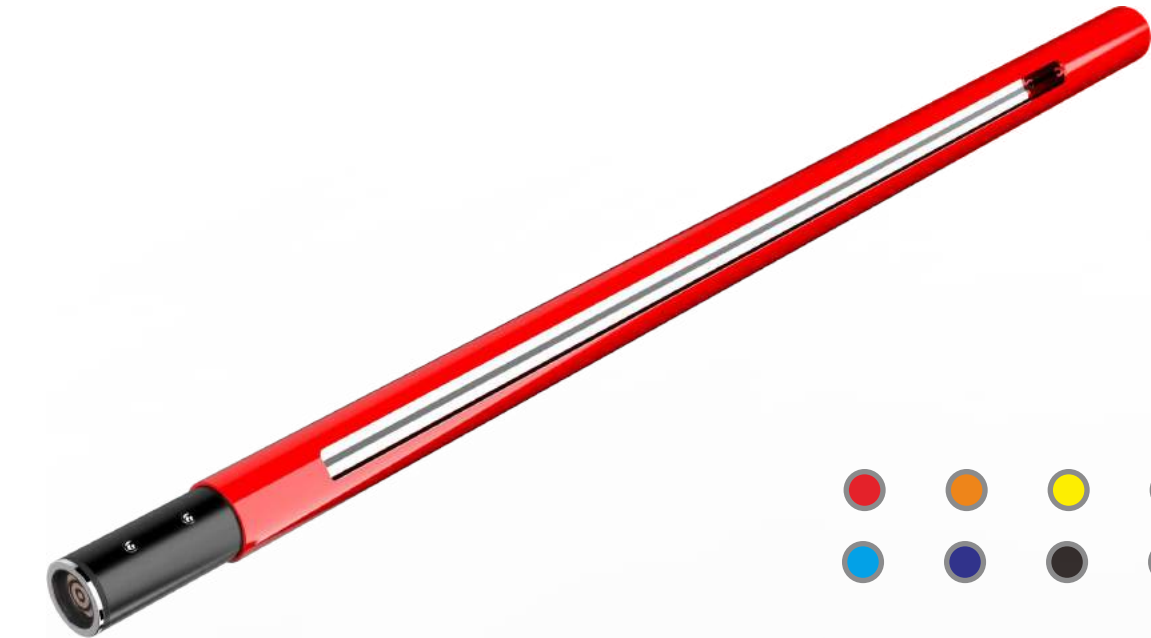

Item no.: KLM- LDD30DY/L330

Size: $\varnothing 30 \times L300\text{mm}$
battery capacity: 2580ma
Input Voltage: DC12V
6063 Aluminum

Color: Red/Orange/Yellow/Green/Sky
Blue/Purple Blue/Black/White
IP rate: IP20

Magnetic mounted

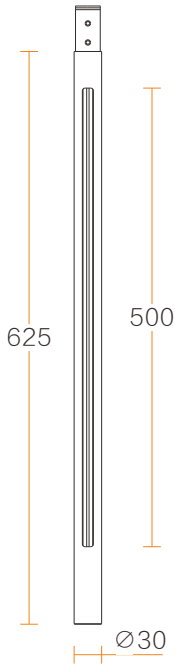

※ There is a built-in battery on the Base, which can turn on the light even when the power is off. The battery life depends on the lamps installed on the floor lamp; the built-in sensor switch can turn on the light when you touch the Base; we use a magnetic connector for the charging head to make the product more stable. Stylish and more fun.

Magnetic DIY led flood lamp–track splicing

Item No. : KLM- LDD30GD/L625
Size : Ø 30 * L 625 m m
Single control 6063 Aluminum
Color:Red/Orange/Yellow/Green/SkyBlue/
PurpleBlue/Black/White
IP Rate : I P 2 0
Magnetic Mounted

It can be seen from the above real pictures that the light spots produced by acrylic Frosted are soft and scattered, different. The facula of the shape is almost unchanged, and it can be considered that the facula of the frosted surface is not affected by the appearance; The light spot on the bright surface will be able to illuminate a unique light spot due to the change of the shape. The main influence on the shape of the light spot is the top shape of the acrylic; come and customize your own light spot.
